

Logic & Math Challenges

- Prime number checker: Identify whether a number is prime
- Binary to decimal converter: Convert between number bases
- Matrix operations toolkit: Perform addition, multiplication, inverse, etc.
- Infinity approximator using series: Explore how infinite series converge
- Epsilon-delta visual tester: Visualize calculus limit definitions
- Set cardinality comparator: Compare finite/infinite set sizes
- Polynomial root finder: Solve for roots using numeric methods
- Topology simulator: Explore abstract surface connectivity
- Quadratic inequality solver: Find solution regions
- Graph traversal visualizer: Show DFS/BFS processes interactively

Electronics & Circuit Projects

- Diode behavior simulator: Show voltage drop and current flow
- Resistor color code decoder: Decode resistor values by color bands
- Voltage drop calculator: Compute drop across wires/components
- RC circuit charging curve plotter: Simulate capacitor charging profiles
- Truth table generator: Auto-generate logic gate tables
- Logic gate simulator: Visual circuit simulation via GUI
- Ohms Law quiz game: Test understanding of $V = IR$
- Potentiometer emulation via GUI sliders: Simulate analog input
- Power consumption estimator: Calculate usage for circuits
- AC/DC frequency visualizer: Display signal behavior over time

System & Tools

- Registry backup tool: Save Windows registry states
- PowerShell command assistant: Store and run common scripts
- Battery health logger: Monitor degradation and charging trends

- BIOS settings checker: Surface hardware config insights
- Encryption key organizer: Safely store cryptographic keys
- BitLocker status notifier: Check drive encryption status
- Startup optimizer: Toggle autostart programs
- Temp file cleaner: Reclaim disk space efficiently
- Internet speed tracker: Log bandwidth over time
- Package installer GUI: Interface for pip installs & updates

Data & File Utilities

- CSV to JSON converter: Switch data formats
- File organizer: Sort files by type/date
- Duplicate file finder: Free up space by removing copies
- PDF compressor: Reduce PDF sizes
- LaTeX previewer: Render .tex files on the fly
- Image size analyzer: Track image dimensions/storage
- Auto renamer tool: Rename files systematically
- TXT-to-audio converter: Generate speech from text
- Markdown to HTML tool: Webify documentation
- Dataset splitter: Prep data for ML models

Games & Fun Projects

- Tic-Tac-Toe with AI: Game with basic decision logic
- Cloud gaming launcher prototype: Frontend launcher concept
- Horror text adventure game: Branching story with suspense
- Memory card flip game: Match and memorize
- Terminal maze runner: Console-based dungeon crawl
- Math challenge platform: Quiz + leaderboard mechanics
- Connect Four with GUI: Learn canvas drawing and logic

- Reaction timer game: Measure reflexes visually
- Hangman with voice prompts: Text and voice input integration
- Offline RPG combat simulator: Turn-based battle mechanics

GUI Experiments (PyQt, Tkinter)

- To-do list manager: Task management
- Custom calculator: Arithmetic interface
- Calendar event planner: GUI calendar with event tracking
- Password manager: Encrypted vault with search
- Notes app with color tagging: Label-based organization
- Music player: Media handling & browsing
- Voice-based dictionary: Microphone input + API query
- Screen brightness controller: System-level GUI tool
- QR code generator: Encode messages to scan
- Image viewer with zoom: Pan and zoom controls in GUI

Networking & Web

- OSI model visual explainer: Diagrams of network layers
- Port scanner GUI: Scan and show open ports
- Local IP tracker: Detect LAN address changes
- Chat server/client: Peer-to-peer text communication
- Web scraper for deals: Auto-check online discounts
- HTTP header analyzer: Decode request-response metadata
- DNS lookup tool: Resolve website IPs
- Simple REST API server: Host and query your endpoints
- Network speed benchmark: Local testing via Python sockets
- Email auto-responder: Auto-reply rules via SMTP/IMAP

AI & Machine Learning Starters

- Sentiment analyzer: Detect tone in comments
- Spam email detector: Classify unwanted messages
- Image classification toy model: Label simple visuals
- Math handwriting recognizer: Convert drawn math into text
- Quiz grader using NLP: Assess short answers semantically
- Adaptive test generator: Smart questions based on performance
- AI tutor for binary systems: Teach conversion concepts
- AI horror story writer: Generate eerie plots
- Pattern recognition from sensor data: Train on signal inputs
- Voice-command toolkit: Execute commands via speech

Creative and Artsy

- ASCII art generator: Text-based visual fun
- Diagram builder: Draw shapes with mouse
- Pixel art editor: Grid-based sketchpad
- Mood board creator: Collage creation from images
- Soundwave visualizer: Animate audio data
- Logo sketcher: Vector design + export
- Flowchart builder GUI: Blocks and arrows tool
- Story plot randomizer: Generate narrative prompts
- Kaleidoscope drawer: Symmetric pattern tool
- Comic book layout tool: Panels and text bubbles editor
